PROJECTS / EXPERIENCE

Cold Email Generator, website

- Built an AI-powered tool that generates personalized cold emails for service-based companies by extracting job listings from company career pages.
- The system uses LangChain to scrape and summarize job descriptions and GROQ's LLaMA3 language model to generate tailored emails.
- A user-friendly web interface is created using Streamlit.

ShareNest – Roommate Finder Web App

- A simple and smart web app to help people, especially students and working people to find roommates who match their city, lifestyle, and living preferences.
- It makes moving to a new city easier by helping users find the right person to share a flat with.

Real-Time Chat Application

Technologies: React, Tailwind CSS, Node.js, Express, MongoDB, and Socket.IO

- Developed a full-stack real-time chat app with one-to-one messaging, user authentication using JWT, and image sharing via Cloudinary.
- Implemented live chat updates, auto-scroll, and message history using Socket.io with a responsive UI built using React and Tailwind CSS.
